In the case of irregularly shaped lots, the minimum frontage may be measured on the front building line rather than the front lot line, but the minimum lot areas must be maintained, for the first 2 dwelling units plus not less than additional land area for each additional dwelling unit in excess of 2 dwelling units in accordance with the following schedule:

One-bedroom dwelling unit - 1,800 sq. ft. and not more than 12 units/acre

Two-bedroom dwelling unit – 2,700 sq. ft. and not more than 10 units/acre

Three-bedroom dwelling unit – 3,700 sq. ft. and not more than 8 units/acre

Four or more-bedroom dwelling unit – 4,700 sq. ft. and not more than 7 units/acre

The land area used for computing densities shall exclude the rights-of-way for all roads, whether public or private.

- l. Each side yard shall be a minimum of 15 feet, and this space shall be increased beyond 15 feet by 2 feet for each 10 feet or part thereof by which the dwelling structure exceeds 40 feet in overall dimension along the adjoining lot line. Maximum building length shall not exceed 200 feet. In no instance shall a multiple-family structure be located closer than 50 feet to an abutting single-family residential district.

Where 2, 3, or 4 townhouse dwelling structures are erected on the same lot or parcel, a minimum distance between any 2 structures shall be 30 feet, with a maximum building coverage not to exceed 30% of the land area.

- m. Mobile home park developments are subject to the minimum requirements and standards as established in the Mobile Home Commission Act, Public Act 419 of 1976, being MCLA §125.2301 et. al, and any and all rules and regulations promulgated pursuant to Act 419, as may be amended.
- n. Sites for the placement and occupancy of mobile home units within a mobile home park developed under Public Act 419 of 1976, being MCLA §125.2301 et. al, shall average 6,050 square feet. The 6,050 square foot requirement may be reduced by up to 20% provided that the individual site shall include a minimum of 5,000 square feet; and further provided that land area in an amount equal to that gained by reduction of a site(s) below 6,050 square feet shall be dedicated as open space. In no instance, however, shall required open space and spatial separation between units be less than that required under R125.1941, Rule 941; R125.1944, Rule 944; and R125.1946, Rule 946 of the Michigan Administration Code.

- o. Off-street parking shall be permitted to occupy a portion of the required front yard, provided that there shall be maintained a minimum unobstructed and landscaped setback of 10 feet between the nearest point of the off-street parking area, exclusive of access driveway, and the nearest edge of the proposed right-of-way line. The plantings in the setback shall meet those of a greenbelt buffer described in §152.078.
- p. Loading space shall be provided in the rear yard in the ratio of at least 10 square feet per front foot of building and shall be computed separately from the off-street parking requirements.
- q. Off-street parking shall be permitted in a required side yard setback provided that there shall be maintained a screening wall between the nearest point of the off-street parking area and the side lot line, when the property line abuts any residential district.
- r. No building shall be located closer than 50 feet to the outer perimeter (property line) of the district when the property line abuts any residential district.
- s. All storage shall be in the rear yard and shall be completely screened with an obscuring wall or fence, not less than 6 feet high, or with a chain link type fence and a greenbelt planting so as to obscure all view from any adjacent residential, business district, or from a public street.
- t. Multiple-family dwellings that provide individual driveways and attached garages such as townhouses shall meet the front yard setback requirements outlined in footnote (a) above.
- u. The total number of single-family residences that may be permitted in the RA District is determined by the configuration of parcels as they existed on the effective date of this chapter. Each parcel in existence on that date will be permitted 1 additional single-family residence per 10 acres or fraction thereof of parcel area. For example, a 20-acre parcel with an existing residence could have 2 lots split off it for additional single-family residential building sites. A 21-acre parcel could have 3. A 20-acre site that was vacant as of the effective date of this chapter would be permitted 2 building sites, which could involve splitting off 2 buildable lots off the original 20 acres or splitting of 1 buildable lot and using the remaining acreage for the second building site.

When lots are split in the RA District, the deed or land contract must identify the number of buildable sites that are being transferred with it. For example, if an individual owned a parcel that was 80 acres at the effective date of this chapter, 8 single-family residences could be built on those 80 acres. If the property owner sold 20 acres, he or she could transfer the right to 1 or all 8 building sites to the buyer of that 20 acres.

- v. The density control provisions for the RSF District are the same as for the RA District outlined in footnote (u) above, with the exception that the density permitted in this district will be 1 unit per 5 acres.
- w. Front yard setbacks for all zoning districts along the M-13/Sheridan Road Corridor and M-21/Corunna Road Corridor shall be a minimum of 150 feet.
- (2) All properties with residential dwellings existing at or before the adoption of this amendment are exempt from the provisions of Footnote w.
- (C) An agricultural building shall be defined as a structure used solely for agricultural purposes in which the use is exclusively in connection with the production, harvesting, storage, drying, or raising of agricultural commodities, including the raising of livestock.
- (D) Minimum lot/parcel widths shall be determined exclusively by the contiguous property with the road frontage of the lot/parcel. Easements shall not be considered or included in determining if a lot/parcel is compliant with the minimum lot/parcel width requirements as set forth herein.

SECTION 2

All other provisions of Chapter 152 inconsistent with the provision of this Ordinance are hereby repealed. All other provisions of Chapter 152 shall be and are hereby ratified.

SECTION 3

This Ordinance shall be published in a newspaper of general circulation within the Township of Clayton, Genesee County Michigan, and shall become effective thirty (30) days following publication.
